Automation Engineer

Location: Arlington VA

About Fluence

Fluence, a Siemens and AES company, is the leading global energy storage technology solutions and services company that combines the agility of a fast-growing technology company with the expertise, vision, and financial backing of two industry powerhouses. Building on the pioneering work of AES Energy Storage and Siemens energy storage, Fluence's goal is to create a more sustainable future by transforming the way we power our world. The company offers proven energy storage technology solutions designed to address the diverse needs and challenges of customers in a rapidly transforming energy landscape, providing design, delivery and integration in over 160 countries. Fluence works closely with customers throughout their journey and provides advisory, financing, and project lifecycle services.

Who are we looking for?

A versatile engineer to be part of the Automation team which predominantly works on improving efficiencies by providing automation, reporting and engineering support for Offer management, Sales and Leadership.

How can you help?

- Work with other departments to refine product and equipment designs based on customer feedback
- Develop/maintain/update proposal documents which include one-lines, layouts and datasheets
- Work closely with engineers, developers to identify and lead automation projects that increase efficiency while maintaining quality
- Compile/develop/maintain Technical Specifications for all Fluence Platforms
- Develop tools, training and support materials to streamline and scale global sales.
- Develop reports (Power BI or Salesforce) as needed by the business and maintain and improve existing ones

- Capture customer technical and application requirements to help shape the product roadmap
- Enable proper knowledge transfer during the transition from proposal to project through automation

What do you need to know?

If you are curious and driven with:
- Bachelors or Masters in Engineering (Electrical, Mechanical, IT, Computer Science)
- Advanced Excel capabilities, including building complex models
- Basic Finance and Accounting skills
- Entrepreneurial drive and ability to prioritize and execute many tasks in parallel
- Experience with business process design, planning and implementation
- Basic Computer programming experience
- Interest in data management, analysis and reporting

You should apply!
