

Job Title: Project Manager  
Location: Alpharetta, GA

## About Fluence

Fluence, a Siemens and AES company, is the leading global energy storage technology solutions and services company that combines the agility of a fast-growing technology company with the expertise, vision, and financial backing of two industry powerhouses. Building on the pioneering work of AES Energy Storage and Siemens energy storage, Fluence's goal is to create a more sustainable future by transforming the way we power our world. The company offers proven energy storage technology solutions designed to address the diverse needs and challenges of customers in a rapidly transforming energy landscape, providing design, delivery and integration in over 160 countries. Fluence works closely with customers throughout their journey and provides advisory, financing, and project lifecycle services.

We are currently looking for a Project Manager to join our team in our Alpharetta, GA office. This Project Manager will develop solutions for packaged inverter and electrical balance of system (eBoS) solutions for power plants utilizing the latest concepts for alternative distributed and centralized power generation.

## Job Description

- Responsible for application engineering and development of integrated alternative distributed and centralized energy power sources in utility applications
  - Includes selection and sizing of the product line with an alternative energy solutions mix
- Responsible for driving the product lifecycle development and critical design review process to execute the development activities on time and within budget.
- Responsible for technical activities to identify, develop, and generate training for internal departments concerning features and functionality.
  - Solutions cover:
    - Battery storage systems
    - AC EboP packages for centralized PV systems
    - Hybrid energy storage systems
    - Distribution transformers
    - Step-up transformers

- Equipment in containerized solution
- Cooling systems – HVAC and forced air
- Balance of System (BoS)
- Communication interfaces (Modbus, TCP/IP, Profinet, Profibus, OPC)
- Substations and Switchgear
- Grounding

## Qualifications

- BS/BA, Electrical Engineering preferred, other engineering degrees will be considered
- 15+ years of relevant experience with electrical solutions such as, but not limited to, LV and MV switchgear, MCCs, GSU and Aux Transformers, Protection Systems, Ground grid, Inverters, breakers, DC distribution, UPS systems, bus ducts, panel boards, switchboards, communication network, PLCs and related equipment.
- Successful applicant will have held specific technical functions such as Field Service Engineer, Project Engineer, Application Engineer, etc, for an OEM company, EPC or A&E.
- Excellent verbal and written communication skills.
- Advanced user of MS Word, Excel, Visio and Project
- Successful applicant must have the ability to travel to support the Sales Team, Vendor Testing, and Commissioning needs at customer sites in North America and Canada.

### Preferred qualifications:

- Project Management
- Product development and testing
- Solutions development
- Proficiency with modeling tools such as SKM, eTAP, PSSE or PSLF
