

Quality Assurance Manager (QAM)

Location: Long Beach, California

Fluence, a Siemens and AES company, is the leading global energy storage technology solutions and services company that combines the agility of a fast-growing technology company with the expertise, vision, and financial backing of two industry powerhouses. Building on the pioneering work of AES Energy Storage and Siemens energy storage, Fluence's goal is to create a more sustainable future by transforming the way we power our world. The company offers proven energy storage technology solutions designed to address the diverse needs and challenges of customers in a rapidly transforming energy landscape, providing design, delivery and integration in over 160 countries. Fluence works closely with customers throughout their journey and provides advisory, financing, and project lifecycle services.

Why We're Here

Our mission is to create a more sustainable future by transforming the way we power our world. Energy storage is critical to this transformation, yet today the market is fragmented and customers face the challenge of finding a trusted technology partner amidst conflicting technical claims, inexperienced vendors and installers, and new market entrants with limited power sector knowledge.

Fluence brings the proven technology solutions and services that overcome the commercial and regulatory barriers that stand in the way of modernizing our energy networks. We are the partner that can deliver at a global scale with the most experienced and knowledgeable team in the world.

Our Origin Story

Fluence is the result of two industry powerhouses and pioneers in energy storage joining together to form a new company dedicated to innovating modern electric infrastructure. In January 2018, Siemens and AES launched Fluence, uniting the scale, experience, breadth, and financial backing of the two most experienced icons in energy storage.

The Fluence team encompasses more than 10 years of experience deploying and operating energy storage. Fluence is driving change by opening new markets to storage

around the world, and has the largest deployed fleet of energy storage projects of any company.

Building from the strong foundation of our parent companies, we are the new generation of energy storage pioneers. We are a new solutions and services provider that believes in solving problems, prioritizing lasting partnerships over delivering products, the desire of users to have input into their energy choices, and the importance of the entire power ecosystem in forging a path to making a sustainable future certain.

About the Job:

The Construction Quality Assurance /Quality Control (QAQC) Manager will be responsible for all Contractor Quality Control functions on energy storage construction projects in California. The QAQC Manager will be responsible for ensuring that all quality control tasks are carried out, documenting the construction process, inspecting each stage of construction and prevent poor material and equipment installation quality on projects.

Responsibilities/Essential Functions:

- Preparation of QA/QC plan and manual in compliance with owners' contract and project specifications
- Responsible for overall QA/QC responsibilities
- Responsible for monitoring and evaluation of contractor's QA/QC plan
- Implementation of QA/QC plan
- Responsible for implementing QC procedures
- Maintain QC records and documents
- Submittal of QC documents and approval of QC documents by an owner when required
- Inspection of works
- Participate in off-site inspection, if needed
- Inspection of some incoming material
- Implement safety plan, if needed
- Monitoring equipment certification
- Insure adequate correction measures are implemented in cases of non-compliance

Qualifications:

- Minimum 8 years of experience as a quality control engineer in major construction projects
- Proficient in MS Office and Excel and other basic computer skills
- Proficient verbal and written communication skills

Qualified candidates are requested to submit a resume and cover letter at careers@fluenceenergy.com for consideration.
