

## Manager, Product Lifecycle Processes

Location: Erlangen, Bavaria, Germany

### About Fluence

Fluence, a Siemens and AES company, is the leading global energy storage technology solutions and services company that combines the agility of a fast-growing technology company with the expertise, vision, and financial backing of two industry powerhouses. Building on the pioneering work of AES Energy Storage and Siemens energy storage, Fluence's goal is to create a more sustainable future by transforming the way we power our world. The company offers proven energy storage technology solutions designed to address the diverse needs and challenges of customers in a rapidly transforming energy landscape, providing design, delivery and integration in over 160 countries. Fluence works closely with customers throughout their journey and provides advisory, financing, and project lifecycle services.

### Job Description

This role, as a member of the Fluence Product Lifecycle Management (PLM) team, will be directly involved in the establishment, maintenance and continuous improvement of Fluence PLM internal processes.

PLM department purpose: The PLM department is responsible for technical and commercial positioning of Fluence products and solutions in the market.

The main goal of Process: PLM will be to ensure leaner operation and processes within PLM Team and other related departments within Fluence to achieve quality, safety and competitive advantages on the market.

Major responsibilities include:

- Documentation Management
- Support creation & maintenance of the Development Roadmaps
- Definition, maintenance, and preparation of PLM templates (e.g. decision making templates)
- PLM project management support
- Product/Solutions Features Backlog
- Interface Management to the other Teams
- Info administration including assuring quality of the information.

## Qualifications

A BS or MS in Quality, Information Management or a related technical degree (e.g. Industrial Engineering) is preferred. The ideal candidate will have 10+ years of experience in Process Quality, PLM, Product Management, Project Management, including working for a small- or mid-size company undergoing rapid growth.

Required skills include:

- Proven ability to learn fast.
- Experience in workflow tools such as JIRA.
- Experience in and knowledge of Agile development framework and principles.
- Practical knowledge of ISO 9001/14001.
- Possesses strong interpersonal communications skills with a proven ability to coordinate with diverse internal and external teams globally.
- Demonstrates sound business judgment.
- Takes individual initiative and works with minimal supervision while being a collaborative team player.
- Works dynamically, across multiple teams and projects concurrently, in a technical business environment.
- Possesses an entrepreneurial drive for getting things done and a “whatever it takes” attitude.
- Has excellent English verbal and writing skills. Additional languages (preferably German) or international work experience is a plus.
- A desire to make the world a better place through technology.
