

Linux Systems Engineer

Location: Arlington, Virginia OR Alpharetta, Georgia

About Fluence

Fluence, a Siemens and AES company, is the leading global energy storage technology solutions and services company that combines the agility of a fast-growing technology company with the expertise, vision, and financial backing of two industry powerhouses. Building on the pioneering work of AES Energy Storage and Siemens energy storage, Fluence's goal is to create a more sustainable future by transforming the way we power our world. The company offers proven energy storage technology solutions designed to address the diverse needs and challenges of customers in a rapidly transforming energy landscape, providing design, delivery and integration in over 160 countries. Fluence works closely with customers throughout their journey and provides advisory, financing, and project lifecycle services.

We are looking for a full-time Linux Systems Engineer to join the team at our Arlington, VA headquarters or Alpharetta, Georgia office. Candidates should thrive in a fast paced, startup environment working with cutting edge technology to build the most resilient, clean, and cost-effective battery storage systems.

Job Description

- Perform maintenance of Fluence energy storage control systems and data collection systems.
- Maintain and improve Fluence operational data collection of reports and key performance indicators.
- Interact with external hardware and software Vendors as needed to maintain production systems.
- Abide by established budgets to maintain production systems.
- Contribute to development of short and long term production infrastructure objectives.
- Participate in continuous improvement of production systems, processes and procedures.
- Create automation and self-serve tools to efficiently manage production systems.
- Perform operation security maintenance and maintain compliance of corporate information security policies and procedures.
- Reproduce and troubleshoot customer software issues. Collect root cause information for resolution by Software Development team.
- Assist Software Development team to implement and resolve customer software issues as needed.

- Provide effective collaboration and exchange of information with external customers and Software Development team to quickly resolve customer related issues.
- Perform other duties and assignments as needed.

Qualifications

- Knowledge of Linux operating system for system administration using Red Hat/Fedora or Ubuntu.
- Interest or classwork in Computer Science, Mathematics, Information Technology or equivalent.
- Some familiarity with open source software, such as MySQL, Python, Ruby, shell, Matlab or Simulink.
- Ability to work effectively in the fast-paced, dynamic Fluence Energy startup environment.
- Strong interpersonal communication skills.
- Enjoys creative problem solving.

Qualified candidates are requested to submit a resume and cover letter at careers@fluenceenergy.com
