

Project Engineer

Location: Manila, Philippines

About Fluence

Fluence, a Siemens and AES company, is the leading global energy storage technology solutions and services company that combines the agility of a fast-growing technology company with the expertise, vision, and financial backing of two industry powerhouses. Building on the pioneering work of AES Energy Storage and Siemens energy storage, Fluence's goal is to create a more sustainable future by transforming the way we power our world. The company offers proven energy storage technology solutions designed to address the diverse needs and challenges of customers in a rapidly transforming energy landscape, providing design, delivery and integration in over 160 countries. Fluence works closely with customers throughout their journey and provides advisory, financing, and project lifecycle services.

Job Description

Reporting to the Project Manager, the **Project Engineer** will work to support and coordinate the project execution activities through close cooperation with all project stakeholders. The focus will be on efficient management of project documentation flow between internal and external engineering teams to ensure all engineering documentation is disseminated effectively to concerned parties and properly approved for execution of procurement and site construction activities. The role will require close coordination with Fluence Document Controller and Engineering Manager, together with client and subcontractor's representatives / subcontractor

Duties and Responsibilities

- Responsible for organizing and controlling project engineering and execution activities between concerned stakeholders, both internal and external to Fluence.
- Works closely with the PM, CPM, Engineering Manager, Scheduler and Procurement Manager to ensure critical activities are addressed in a timely manner
- Acts as the technical facilitator for engineering design document dispersal between Internal Engineering Dept, Document Controller, Client and Subcontractor, ensuring timely review and approval.

- Assists the Engineering Manager to prioritize and schedule project design review activities according to critical path.
- Attends the Weekly Progress Meetings (Internal as well as with Client) and assist in preparation of Minutes of Meetings.
- Coordinates with the Project Scheduler to review work in progress and prepare weekly reports of the status of each project.
- Assists in the logistics and site delivery of all equipment and materials to the construction site, including any commissioning requirements.

Experience and Educational Requirements

- Degree in Electrical Power Engineering
- Min 5 years relevant experience in Electrical Power projects (Generation, T&D, Renewables, Energy Storage etc.) in the capacity of Project Engineer.
- Detailed component level understanding of BESS, power conversion system and substation.
- Ability to work in a fast paced and challenging environment.
- Able to work independently on own initiative in a multi-cultural environment.
- Needs to be well organized, with a strong attention to detail.
- Well versed in Microsoft Office, especially Excel
- Fluent in English, with a second language, preferably Tagalog.

Qualified candidates are requested to submit a resume and cover letter at careers@fluenceenergy.com for consideration.
