

System Administrator

Location: Arlington, Virginia

About Fluence

Fluence, a Siemens and AES company, is the leading global energy storage technology solutions and services company that combines the agility of a fast-growing technology company with the expertise, vision, and financial backing of two industry powerhouses. Building on the pioneering work of AES Energy Storage and Siemens energy storage, Fluence's goal is to create a more sustainable future by transforming the way we power our world. The company offers proven energy storage technology solutions designed to address the diverse needs and challenges of customers in a rapidly transforming energy landscape, providing design, delivery and integration in over 160 countries. Fluence works closely with customers throughout their journey and provides advisory, financing, and project lifecycle services.

We are currently looking for a Systems Administrator to join our team in our Arlington, VA headquarters.

Responsibilities

- Maintain system functionality, availability, security, and performance
- Collaborate with multiple teams to ensure success in deployment, project delivery, support, and documentation
- Provide technical support for distributed enterprise systems: emphasis on network management includes areas such as router and switch capacity and performance, license management, and security design.
- Discuss technical requirements with vendors and provide technical specifications
- Assist in the preparation of network systems specifications and technical documentation for network systems in coordination with business units and vendors.
- Research developments in network hardware and software products as they may apply to the enterprise.

- Analyze, design, test, install, document, and maintain computer systems which have a moderate to high degree of complexity
- Organize and deliver services on a cross-section of projects and teams
- Maintain technical knowledge within industry and service line and leverage deep subject matter knowledge on engagements
- Contribute to the development and cultivation of business and vendor relationships
- Display business judgment in anticipating client/project needs and developing alternative solutions
- Responsible for managing solutions, delegating resources, and helping to ensure quality assurance principles are met across projects and deliverables

Qualifications

- Bachelor's Degree in Computer Science, Information Technology, Information Systems Security, Cybersecurity, or related field; Master's degree preferred.
- 5+ years of relevant consulting or industry experience
- Expertise in Linux (Kernel, Bridge Interfaces)
- Experience in Networking and Network Management Tools
- Experience in Ruby, Python and Splunk
- Experience in Configuration Management (Puppet/Ansible)
- Knowledge and experience in open source tools
- Experience in Security (Nessus)
- Experience Tracking and Managing Documentation and Work Tickets via a tool similar to Confluence/Sharepoint/JIRA

Qualified candidates are requested to submit a resume and cover letter at careers@fluenceenergy.com for consideration.
