

APAC Solutions Engineering Manager

Location: APAC Region (Flexible)

ABOUT FLUENCE

Fluence, a Siemens and AES company, is the leading global energy storage technology solutions and services company that combines the agility of a fast-growing technology company with the expertise, vision, and financial backing of two industry powerhouses. Building on the pioneering work of AES Energy Storage and Siemens energy storage, Fluence's goal is to create a more sustainable future by transforming the way we power our world. The company offers proven energy storage technology solutions designed to address the diverse needs and challenges of customers in a rapidly transforming energy landscape, providing design, delivery, and integration in over 160 countries. Fluence works closely with customers as trusted advisors throughout their journey and provides advisory, financing, and project lifecycle services.

Job Description

We seek a person passionately committed to a sustainable energy future who will help deliver Fluence Energy Storage Projects in Asia Pacific.

The APAC Engineering Manager will coordinate Fluence multi discipline solutions engineering teams across the APAC region and liaise and collaborate with the global engineering teams, have exceptional foresight, great communication skills, a working knowledge of different engineering disciplines and how they relate to one another, and an aptitude for managing risk. Candidates will have proof of their supervisory and technical skills, and an appreciation for the complex nature of the industry.

Responsibilities

- Proposing and managing budgets for projects.
- Supervising the work of multiple teams.
- Planning and executing strategies for completing projects on time.
- Determining the need for training and talent development.
- Hiring contractors and building teams.
- Ensuring engineering solutions have support of upper management.
- Providing clear and concise instructions to engineering teams.
- Ensure that completed systems conform to all specifications, codes, and customer requirements.

• Travel throughout the APAC region to customer projects and suppliers.

Qualifications

- BS/BA minimum; Electrical Engineering preferred, but other fields will be considered.
- Master's degree in engineering management or business administration or relevant experience.
- 15+ years of engineering experience, ideally in a management role.
- Experience in Engineering, Procurement and Construction (EPC) for High Voltage Systems, Wind, Solar, or Conventional Power Generation.
- Experience within the Energy Storage business is beneficial
- Excellent verbal and written communication skills.
- Leadership skills needed to develop and manage a team.
- Organizational competencies and project management skills to keep projects, processes, and the entire engineering team on track.
- Self-motivated attitude with the ability to multitask and thrive in a timeline-driven environment
- Interpersonal communication skills with expertise in resolving disagreements and distilling complicated topics to a broader audience.
- Ability to work individually or as part of a team.
