

Engineering Project Manager

Manila, PH (or APAC Region)

ABOUT FLUENCE

Fluence, a Siemens and AES company, is the leading global energy storage technology solutions and services company that combines the agility of a fast-growing technology company with the expertise, vision, and financial backing of two industry powerhouses. Building on the pioneering work of AES Energy Storage and Siemens energy storage, Fluence's goal is to create a more sustainable future by transforming the way we power our world. The company offers proven energy storage technology solutions designed to address the diverse needs and challenges of customers in a rapidly transforming energy landscape, providing design, delivery, and integration in over 160 countries. Fluence works closely with customers as trusted advisors throughout their journey and provides advisory, financing, and project lifecycle services.

Job Description

We seek a person passionately committed to a sustainable energy future who will help deliver Fluence Energy Storage Projects in Asia Pacific.

The Engineering Project Manager will coordinate Fluence project teams with subcontractors, including civil, electrical, and mechanical subcontractors, in different countries of APAC and, to deliver Fluence energy-storage installations on time, budget, and spec. The person will have a thorough grasp of relevant engineering issues, connection requirements, and regulatory environments and will handle several projects simultaneously.

Responsibilities

- Ensure that completed systems conform to all specifications, codes, and customer requirements.
- Serve as the first point of contact and technical expert.
- Provide support to Project Procurement by drafting specifications and performing technical reviews of vendor quotations.
- Coordinate between Fluence teams at worksites (many abroad)
- Answer questions and resolve issues brought forward by internal project team members, subcontractors, and customers.
- Propose and oversee budgets and timelines for the engineering component of the project(s).

- Review and confirm the accuracy of the work performed and the methods used by engineering staff and contractors.
- Conduct various tests and quality assurance checks to verify the quality of completed projects.
- Communicate and collaborate with suppliers, and contractors.
- Prepare and deliver various engineering-related presentations, both internally and externally.
- Frequent travel throughout the APAC to customer projects and suppliers.

Qualifications

- BS/BA minimum; Electrical Engineering preferred, but other fields will be considered.
- Master's degree in engineering management or business administration preferred.
- 10+ years of engineering experience, ideally in a management role.
- Experience in Engineering, Procurement and Construction (EPC) for High Voltage Systems, Wind, Solar, or Conventional Power Generation.
- Experience within the Energy Storage business is beneficial
- Excellent verbal and written communication skills.
- Leadership skills needed to develop and manage a team.
- Organizational competencies and project management skills to keep projects, processes, and the entire engineering team on track.
- Self-motivated attitude with the ability to multitask and thrive in a timeline-driven environment
- Interpersonal communication skills with expertise in resolving disagreements and distilling complicated topics to a broader audience.
- Ability to work individually or as part of a team.
