

Project Engineering Manager

Location: Continental US

ABOUT FLUENCE

Fluence, a Siemens and AES company, is the global market leader in energy storage technology solutions and services, combining the agility of a technology company with the expertise, vision and financial backing of two well-established and respected industry giants. Building on the pioneering work of AES Energy Storage and Siemens energy storage, our goal is to create a more sustainable future by transforming the way we power our world. Providing design, delivery and integration, Fluence offers proven energy storage technology solutions that address the diverse needs and challenges of customers in a rapidly transforming energy landscape.

Fluence currently has more than 2.4 gigawatts of projects in operation or awarded across 24 countries and territories worldwide. We topped the Navigant Research utility-scale energy storage leaderboard in 2018 and were named one of Fast Company's Most Innovative Companies in 2019. In 2020, our sixth-generation Tech Stack won Commercial Technology of the Year at the 22nd annual S&P Global Platts Global Energy Awards.

Leading

Do others come to you for your subject matter expertise? Are you excited by the challenge of working in a start-up atmosphere with a purpose?

The Project Engineering Manager owns the technical scope for assigned Fluence projects. The role will serve as the technical point of contact to the Fluence project team, our customers, regulatory and other officials, as well as key supply chain or service partners for the assigned project.

Responsible

Fluence is defined by its unwavering commitment to safety, quality, and integrity. We take personal ownership in what we do, developing trust in our relationships with internal and external stakeholders. We firmly believe in having honest, forthcoming, and fair communications. In this role you will:

- Manage external engineering firms, subcontractors and as well as internal engineering disciplines (civil, electrical, network, permitting) to meet on time, on budget, and high quality completion of project deliverables.

- The candidate will be responsible for ensuring deliverables meet contractual requirements, are constructable, and that country / regional impacts to design / cost are considered by engineering functions.
- Manage internal and external design review meetings and verify compliance with the Fluence internal quality program certified to ISO 9001. Drive a culture of value engineering and encourage innovation and innovative approaches for best in class system design / constructability
- Support Project Procurement by developing construction and electrical equipment specifications and performing technical reviews of vendor and subcontractor technical proposals.
- Review internal and subcontractors design to ensure compliance with project requirements and contractual obligations.

Agile

Here at Fluence, we strive to continuously improve, be intellectually curious and be adaptive to our customers and employee's needs. Collaboration is key, both in our partnerships with our customers, and with each other. Fluence prioritizes the most critical efforts that allow for the greatest impact. As a qualified candidate you have the following:

- Bachelors or Master's degree or equivalent in engineering plus minimum of 10 years related experience.
- Ability to work in a manner consistent with the Fluence values of Leading, Agile, Responsible, and Fun.
- Deep knowledge and experience executing engineering for EPC type power projects that include civil, medium voltage, and high voltage scope.
- Eager to be part of a fast-growing company and to be a leader in a rapidly developing part of the power sector.
- Ability to manage a several projects with time-sensitive project deliverables simultaneously and deliver them on budget, and to the satisfaction of the customer.
- Strong written and oral communication skills, including the ability to present ideas and suggestions clearly and effectively to internal and external audiences.

Fun

Working on transforming a fundamental part of our society is exciting and fulfilling. It requires creativity, diversity of ideas and backgrounds, and building trust to effect change and move with speed. We respect our coworkers and customers. We listen to what others have to say, and we are inclusive.

You are eager to be part of a fast-growing company and to be a leader in a rapidly developing part of the power sector.
