

## **Battery System Engineer**

**Location: (Arlington, VA, or Continental US)**

### **ABOUT FLUENCE**

Fluence, a Siemens and AES company, is the global market leader in energy storage technology solutions and services, combining the agility of a technology company with the expertise, vision and financial backing of two well-established and respected industry giants. Building on the pioneering work of AES Energy Storage and Siemens energy storage, our goal is to create a more sustainable future by transforming the way we power our world. Providing design, delivery and integration, Fluence offers proven energy storage technology solutions that address the diverse needs and challenges of customers in a rapidly transforming energy landscape.

Fluence currently has more than 2.4 gigawatts of projects in operation or awarded across 24 countries and territories worldwide. We topped the Navigant Research utility-scale energy storage leaderboard in 2018 and were named one of Fast Company's Most Innovative Companies in 2019. In 2020, our sixth-generation Tech Stack won Commercial Technology of the Year at the 22nd annual S&P Global Platts Global Energy Awards.

### **Leading**

Do others come to you for your subject matter expertise? Are you excited by the challenge of working in a start-up atmosphere with a purpose?

In this role you will be responsible for managing the design, development, specification, and evaluation of ESS Li-ion batteries. You will be a member of a team focused on specification and evaluation of supplier developed systems and components and their integration into Fluence stationary energy storage systems. You will define and manage requirements with suppliers and internal partners and be both a technical leader and project manager.

### **Responsible**

Fluence is defined by its unwavering commitment to safety, quality, and integrity. We take personal ownership in what we do, developing trust in our relationships with internal and external stakeholders. We firmly believe in having honest, forthcoming, and fair communications.

- Responsible for hardware and software requirements documents, working with Sales, Engineering, Project Management and Product teams.
- Lead and Manage supplier development including design reviews.
- Manage and coordinate development and validation testing.

- Work with project/product management to track and maintain schedule.
- Develop a deep understanding of supplier ecosystem and solutions to be able to manage and communicate technical risks to the broader Fluence team.
- Travel as needed up to 25% with exceptions for pandemic conditions.

## **Agile**

Here at Fluence, we strive to continuously improve, be intellectually curious and be adaptive to our customers and employee's needs. Collaboration is key, both in our partnerships with our customers, and with each other. Fluence prioritizes the most critical efforts that allow for the greatest impact.

- Passion for batteries, sharing know-how, and learning from others.
- Ability to utilize data and statistical analyses to make design decisions.
- Technical knowledge in broad area of engineering disciplines (Electrical, Electronics, Mechanical, Thermal, Materials, Safety, Test/Validation, Manufacturing)
- 7+ years in design and development of high voltage battery systems.
- Strong knowledge of system engineering principles.
- Experience with requirements management and test tracking tools. (Jira, Jama, Doors, TestRail, etc.)
- B.S. in Engineering or related field

## **Fun**

Working on transforming a fundamental part of our society is exciting and fulfilling. It requires creativity, diversity of ideas and backgrounds, and building trust to effect change and move with speed. We respect our coworkers and customers. We listen to what others have to say, and we are inclusive.
