

# Supply Chain Project Manager

Location: Arlington, VA or Continental US

## ABOUT FLUENCE

Fluence, a Siemens and AES company, is the global market leader in energy storage technology solutions and services. Fluence is creating a more sustainable future by combining the agility of a technology company with the expertise and vision of two respected industry giants.

## OUR CULTURE AND VALUES

We are a start up with a purpose to transform the way we power our world. It requires creativity, diversity of ideas and backgrounds, and building trust to effect change and move with speed.

### **We are Leading**

Fluence currently has 2.4 gigawatts of projects in operation or awarded across 24 countries and territories worldwide—and we are growing every day.

### **We are Responsible**

Fluence is defined by its unwavering commitment to safety, quality, and integrity.

### **We are Agile**

We achieve our goals and meet our customer's needs by cultivating curiosity, adaptability, and self-reflection in our teams.

### **We are Fun**

We value the diversity in thought and experience of our coworkers and customers. Through honest, forthcoming, and respectful communications we work to ensure that Fluence is an inclusive and welcoming environment for all.

## ABOUT THE POSITION

The Project Manager is responsible for planning and overseeing supply chain projects to ensure they are completed in a timely fashion and within budget. The Project Manager plans project resources, prepare budgets, monitor progress, and keeps stakeholders informed the entire way. This role will work directly with Supply Chain leadership to ensure deliverables fall within the applicable scope and budget. He or she will coordinate with other departments to ensure all aspects of each project are compatible with processes and systems.

- Analyze project proposals to determine time frame, funding limitations and appropriate process for accomplishing projects.
- Identify, schedule and monitor project deliverables, milestones, and required activities and tasks.
- Provide leadership and motivation to project team members throughout the project life cycle, and work with project staff to outline work plan.
- Assign duties, responsibilities, and scope of authority to project personnel.
- Direct and coordinate activities of project personnel to ensure that the project progresses on schedule and within budget.
- Review status reports prepared by project personnel and modify schedules or plans as required.
- Establish standards and procedures for project reporting and documentation.
- Aid in development of portfolio and technology roadmap

What will our ideal candidate bring to Fluence?

- Bachelor's degree with 8+ years of experience in global supply chain, manufacturing, or a similar role.
- Project Management Professional "PMP" Certification or Agile/Scrum Certification (required)
- Lean Training - Green/Black Belt (required)
- Proven ability to quickly learn new applications, processes, and procedures
- Able and willing to collaborate in a team environment and exercise independent judgment
- Excellent verbal and written communication skills
- Professional image with the ability to form good partner relationships across functions
